KF Kentucky
FERTILIZER

A MORE SUSTAINABLE WAY TO GREEN UP YOUR LAWN

-  Biostimulated enhanced
-  Biostimulates improve natural plant nutritional process
-  Optimize nutrient use
-  Great for use on lawns, gardens, & flower beds
-  Provides Calcium and Magnesium
-  Raises soil pH faster
-  OMRI Listed
-  Covers up to 5,000 sq. ft.

If your lawn is yellow and thin, the pH may be below 6.2. Our rapid-reacting pelletized limestone will give your lawn a boost and help bring it back to the lawn you want and can be proud of.

When the pH is in the optimal range of 6.2 to 7, nutrients become more available, therefore less fertilizer needs to be applied preventing excess fertilizer runoff into lakes and streams.

Our enhanced limestone is designed to react quickly in the soil but also keeps working all season long.

Enhanced limestone is safe for all grasses, and is people and pet friendly. Apply with any rotary spreader. This 25-lb bag can treat up to 5,000 square feet. Pelletized for clean, easy application.

KF *Kentucky*
FERTILIZER
ENHANCED LIMESTONE

Developed to react quickly when applied

Biostimulants to keep turf green and healthy

Friendly to the environment - OMRI listed as organic

Raises pH to support nutrient uptake
